

The **Open Materials** badge is earned by making publicly available the components of the research methodology needed to reproduce the reported procedure and analysis.

Criteria

1. Digitally-shareable materials are publicly available on an open-access repository. The materials must have a persistent identifier and be provided in a format that is time-stamped, immutable, and permanent (e.g., university repository, a registration on the [Open Science Framework](#), or an independent repository at www.re3data.org).
2. Infrastructure, equipment, biological materials, or other components that cannot be shared digitally are described in sufficient detail for an independent researcher to understand how to reproduce the procedure.
3. Sufficient explanation for an independent researcher to understand how the materials relate to the reported methodology.

Preprints

- What?
- When?
- Journal Policies
- Pros & Cons
- Experiences

What?

- article that has not yet been peer-reviewed
 - draft
 - working paper
 - finished (...peer-reviewed...) manuscript

Journal Policies: Post Peer-Review

Journal:	Psychological Science [1] (ISSN: 0956-7976, ESSN: 1467-9280)
RoMEO:	This is a <u>RoMEO green</u> journal
Paid OA:	A paid open access option is available for this journal.
Author's Pre-print:	✓ author can archive pre-print (ie pre-refereeing)
Author's Post-print:	✓ author can archive post-print (ie final draft post-refereeing)
Publisher's Version/PDF:	✗ author cannot archive publisher's version/PDF
General Conditions:	<ul style="list-style-type: none">• Author's post-print on author's personal website, departmental website or institutional repository immediately• Author's post-print on other repositories including PubMed Central after 12 months embargo• Must link to publisher version• Publisher's version/PDF cannot be used
Mandated OA:	(Awaiting information)
Paid Open Access:	SAGE Choice
Notes:	<ul style="list-style-type: none">• Publisher last contacted on 14/08/2013
Copyright:	Policy
Updated:	24-Oct-2013 - Suggest an update for this record

Journal Policies: Post Peer-Review

Pilot: Monitoring of Unauthorized Internet Posting of Journal Articles

APA is committed to

- preserving the scientific integrity of the research we publish, including linking the authoritative document with any ensuing corrections or retractions so that readers have the most updated information;
- minimizing security threats to authors and readers by providing a secure web environment to access APA content;
- making APA resources available for free or at low cost in low- and middle-income countries through the World Health Organization's [HINARI/Research 4 Life](#) initiative; and
- maintaining association funds to support APA's mission to create, communicate, and apply psychological knowledge to benefit society and improve people's lives.

Journal Policies: Post Peer-Review

“We regret that our recent takedown messages upset some of our authors, who are not the target of the program,” Jasper Simons, APA executive publisher, says in the release. “Our goal remains to preserve the integrity of the scholarly record and stop the illegal sharing of content on piracy sites. We support the noncommercial sharing of content by our authors in line with our posting guidelines.”

Journal Policies: Pre Peer-Review

- “We **do** support posting of research papers on not-for-profit preprint servers such as [arXiv.org](https://arxiv.org) and bioRxiv.org.
- While a manuscript is under consideration at a *Science* Journal **no versions revised** in response to editorial input and peer review **should be posted** on a preprint server.
- Manuscripts posted at a preprint server **should not be discussed with the media** prior to publication.”
<http://www.sciencemag.org/authors/science-journals-editorial-policies>, 01/03/2018, **emphasis** added

Journal Policies: Pre Peer-Review

- https://en.wikipedia.org/wiki/List_of_academic_journals_by_preprint_policy (not an exhaustive list)
- Only two that explicitly rule out preprints
 - NEJM [New England Journal of Medicine] expects that the articles it publishes will not have been published or released elsewhere before they are published in NEJM. The policy page does not explicitly mention preprints; however, the journal has come under public scrutiny.
 - The JCI [Journal of Clinical Investigation] considers the following to be prior publication and therefore unacceptable:
 - any printed or online material describing the findings, methods, or results of a submitted/in-press manuscript in excess of 400 words;
 - any published tables or illustrations that in any way duplicate the content of another manuscript;
 - any posters shown other than at a professional meeting and leaflets distributed other than to a professional audience (...)

Pros & Cons

- ...depend on the stage at which the preprint is posted
- late preprints are a way to circumvent journal paywalls
- What about preprints prior to acceptance by a journal?
 - Scooping vs. establishing primacy
 - Early career: Show (don't tell) work in progress
 - Feedback

Experiences
